

MINI MEDICAL SCHOOL IS DESIGNED FOR STUDENTS IN GRADES 4 TO 8

CPASS FOUNDATION MINI MEDICAL SCHOOL

Students get a firsthand look at how doctors think, explore real medical concepts, and experience health sciences education the way it was meant to be: hands-on, engaging, and way beyond a textbook — all on real medical school campuses.

If your child is curious about the human body, science, or what it's like to work in medicine, this program was made for them.

Just keep in mind that each location runs its own independent program, so grade eligibility, availability, and schedules may vary by site.

Locations:

Illinois Locations

- Rosalind Franklin University of Medicine & Science
- Rush University Medical School
- University of Illinois College of Medicine Peoria
- Carle Illinois College of Medicine

Locations Outside of Illinois

- Ponce Health Sciences University (St. Louis)
- Palmdale Regional Medical Center (California)

Note: Curriculum through 8th grade varies by site

ONE OF A KIND EXPERIENCE FOR YOUR CHILD...

- Real campuses, real experiences. Students learn in the same spaces where future doctors are trained.
- Hands-on from day one. This isn't a lecture series — it's interactive, engaging, and designed to spark curiosity.
- Tuition-free. This program is fully scholarship-funded, at no cost to your family.
- Early exposure matters. Research shows that early exposure to STEMM careers increases the likelihood students will pursue them. This is that moment.
